## 1. Summary

On April 10 build was released. The build has successfully passed 85 % of the smoke test, and 75 % of the critical path test. 86 % of the requirements of high importance are implemented correctly. Most of the quality indicators are in the green zone, but the project needs 1 more week of refinement. The next iteration (April 17) is scheduled to run the remaining low priority tests.

## 2. Test team

Name	Role	Responsibility
Danila Kulinkovich	Tester	Documentation creation, test-cases execution, participation in code-review
John Pork	Senior developer	Participation in requirements testing and code review

## 3. Testing process description

The built was tested under Windows 11 Ent x64. The smoke test and Critical path test was performed manually. Testing shows middle stability of functionality (found defects of different significance, see in file: "Defect Reports").
